1 Introduction

L'enjeux de notre projet est d'apporter une interface web facilitant l'échange d'informations entre la maintenance, les pilotes et la gestion.

Pour cela, le site doit permettre aux pilotes de rentrer directement leur technical log sur le site juste après le vol. Ces données seront traitées pour être répertorié dans un fichier excel contenant les informations nécessaires au suivi de chaque avion.

L'interface devra générer des statistiques précises sur chaque avion à la demande du client.
